

THE ANATOMY OF A SECURE PASSWORD

LONGER IS STRONGER

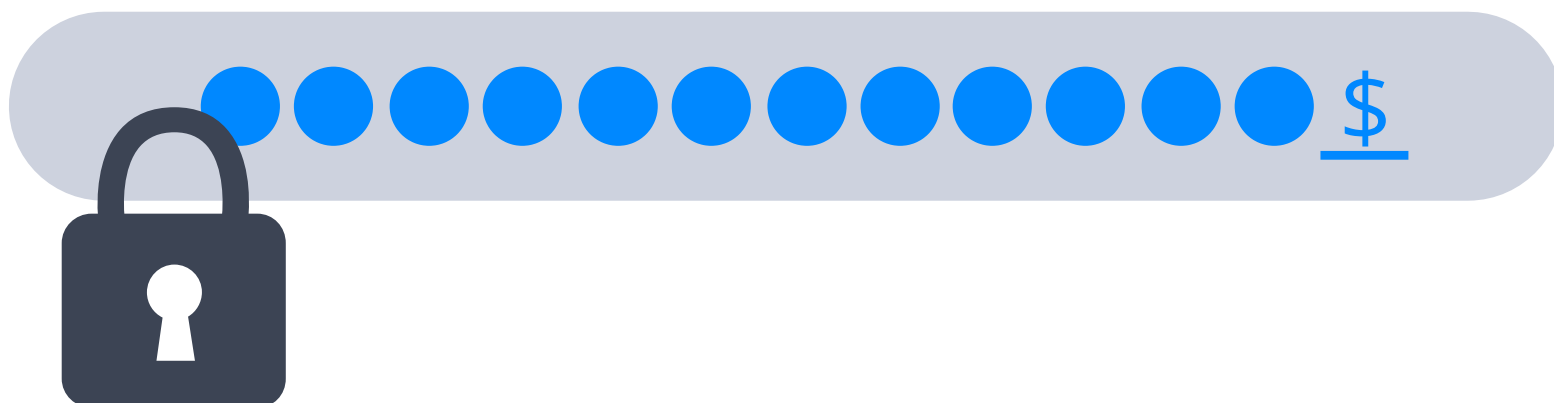

Passwords should be between 12 and 14 characters.

COMPLEX

Use a combination of character sets including uppercase and lowercase letters, numbers, and special characters.

PASS PHRASES

Employ a mnemonic strategy to facilitate new password creation and aid in remembering them.

UNIQUE

Create a different password for each account. **Don't** use one password across multiple platforms.

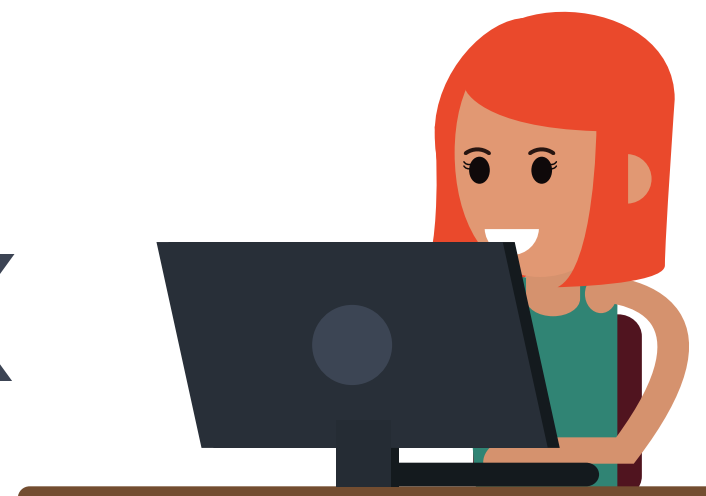

PASSWORD VAULTS

Consider storing your credentials using a password vault.

SWITCH IT UP

Change your password every 3 to 6 months.

Visit cyber.nj.gov for more information.

NJCCIC

The NJ Cybersecurity & Communications Integration Cell is a component organization within the NJ Office of Homeland Security & Preparedness
